FUTURE NATION

Program | April - November 2020 | smartcitiesweek.com

ENGAGEMENT

Networking | Knowledge Sharing | Skills Development
Project Planning | Intelligence Gathering

DATA DIALOGUES

Monthly deep dives into a 'data activation' topic, hosted by the Centre for Data Leadership. Consider it a live 'vodcast' with a panel of national and international data leaders.

DISCOVERY SESSIONS

Highly interactive and rapid discovery sessions. No speakers, just peers who are looking to share their ideas and views on an emerging smart cities topic. We use an online canvas to record our thoughts.

COLLABORATIVE PROJECT PLANNING

A SCW ANZ feature, these multi-week online collaborative project planning sessions help you prepare a project roadmap for a key deployment or initiative. Using structured templates and modules in the SCC's Smart Cities Activator platform, you will hear from public and private sector leaders to share their project stories and recommendations to help advance your projects.

PLENARY SESSIONS

Just like a conference, but online. Keynote speakers from around the world addressing leading topics with inspiring stories.

VIRTUAL POLICY ROUNDTABLES

Small group dialogues around critical smart cities policy issues with national and international guests, facilitated by a chairperson.

CITY ENCOUNTERS

Case studies, plain and simple. At 12min each you will be exposed to 15 leading case studies covering key themes, structured in the same way - the challenge, the solution and the lessons learned.

DIGITAL TWIN WEEK

Join us for a celebration of Digital Twin as a platform for activating and valuing data and delivering greater benefits to our communities, environment and economy.

AND MORE...

PROGRAM

At a Glance

Realise the Value

smartcitiesweek.com

WHAT A YEAR SO FAR!

In a year where conferences are either being cancelled, or in-person events are just being converted to on-line formats, Smart Cities Week Australia New Zealand 2020 takes a different approach.

Let us explain.

NOT ALL SESSIONS ARE CREATED EQUAL

There are only so many streamed 'talking heads' one can take. We are conscious of webinar overload. That's why SCW ANZ brings variety.

Rapid interactive discovery sessions over lunch. Deeper multi-week collaborative project planning. International keynotes that you can sit back and listen to for inspiration. Small group policy dialogues. Matter-of-fact case studies at 12mins a piece on lessons learned.

MULTI-SECTOR

Each and every session has been designed for both public and private sector engagement. Cities learning from cities, cities learning from the private sector and the private sector gathering intelligence from cities.

Networking, knowledge exchange, capacity building and intelligence gathering are the minimum opportunities you can realise in each SCW ANZ engagement session.

THE TIME IS NOW

It is now, more than ever, that we need to come together. For government, we cannot put project planning on hold. We cant wait until things change to get back to networking and knowledge sharing.

And for the private sector, you cannot push pause on business development. Cities and government agencies need support, and solutions more than ever.

And yes, the climate will be different, but that will drive innovation. New business models, new partnerships and new solutions. No matter your 2020 plan's in this time of disruption, there is opportunity within our program learn, exchange and create opportunities.

The Smart Cities Council is committed to helping achieve sustainable development in three dimensions - economic, social and environmental - in a balanced and integrated manner as represented in the UN Sustainable Development Goals.

ABOUT US

"Tech and Data for Good"

VISION

We envision a world where digital technology, data and intelligent design have been harnessed to help accelerate, as a matter of urgency, the outcomes articulated in the United Nations Sustainable Development Goals.
