

Johnson Controls is Powering the COVID-19 Crisis Response

Solutions and Capabilities for Local Government

Johnson Controls is committed to serving local governments during the COVID-19 crisis. We have the global experience, national workforce and expertise to work with cities, towns and counties during this difficult time to help prepare and respond to critical needs, and help to stand up a path toward recovery.

We have proven to be a cornerstone of local government infrastructure in North America

- Johnson Controls solutions are in 579 cities and counties
- We have 120 branch locations in North America supported by 25,000 employees
- Recognized by federal, state and local governments as a provider of essential products, services and personnel

We continue to provide urgent COVID-19 local government solutions

As local governments respond to COVID-19, they are forced to digitize many of their services. Remote work and council meetings are being conducted over teleconferencing systems. Johnson Controls can deliver the technologies and solutions to support communities through these unprecedented times while helping them continue to evolve. Johnson Controls stands ready to help local governments as they navigate the new normal.

- Providing healthy environments for citizens, constituents and business owners
- Confronting uncertain funding challenges and identifying procurement options that enable local governments to act quickly on priority projects
- Enabling more remote services to provide distance monitoring and servicing of infrastructure

- Updating and maintaining Building Automation Systems so that local infrastructure has the indoor air quality that is essential to current and future healthy, clean public environments

Johnson Controls can rapidly mobilize technical resources – including planning and design engineers, project managers, installers, communication specialists, service technicians and more – to help communities meet their needs, protect citizens and stay ahead of the crisis. We are here to help local governments get through COVID-19 and are prepared to help them recover and rebuild their communities.

Backed by our global Centers of Excellence, we can rapidly deploy resources and bring world-class expertise to your local crisis response site.

Financing options available through Johnson Controls can help you preserve valuable cash and improve the safety of your community. Our team can also assist in tracking disaster relief funds and grants.

Our local government experts will listen to your needs and quickly respond with solutions, services and expertise. Contact us today.

The power behind **your mission**

COVID-19 Local Government Crisis Response

Johnson Controls can help local governments build a more secure, connected & resilient future

More connected: Enhance communications, operations and maintenance

- Help local governments communicate information and critical actions, such as travel bans, health safety messages and quarantine measures
- Aid in healthcare partnerships to create make-shift hospitals and healthcare facilities
- Provide real-time data, shared across public safety resources to allow for a more proactive, coordinated and informed response
- HVAC systems programmed to reduce energy use and ease the strain on aging infrastructure, especially during unoccupied periods
- Remote monitoring of systems allowing for more efficient operations at a time when preserving resources is critical
- Integrated systems to reduce costs, enhance technology, and improve energy and operational efficiency
- On-time delivery, servicing and integration of HVAC, fire, security and life safety technology

More secure: Maximize safety for citizens and constituents

- Rapid security equipment installation for temporary or repurposed sites
- Rapid access control and visitor management set up
- Improve emergency response time with surveillance cameras
- Remote security monitoring of video, intrusion and access control
- Remote Services can diagnose and resolve many system issues quickly over the phone
- Assurance Services can monitor the performance and compliance of your physical and cyber security assets to proactively detect problems, and resolve them
- Elevated body temperature screening devices optimized to meet the needs of your facility
- Closure of public spaces, including parks, playgrounds and community centers
- Protection for individuals experiencing homelessness
- Improvements and service to air filtration applications or new air filtration system installation

More resilient: Put municipal governments on the path to recovery

- Develop preparedness and resiliency plans for cities and communities to get back up and running, including microgrid creation and workforce development programs
- Build and maintain resilient infrastructure, services and networks to mitigate future emergencies
